Advanced Information Management Celebrates 10 Years In Business

---

Orange, CA – January 24, 2012 - Advanced Information Management (AIM) announced the celebration of their 10<sup>th</sup> anniversary of providing clients with comprehensive financial, distribution, service and Manufacturing solutions that suit distinctive business requirements.

AIM was founded in 2002 by Scott Barnes in Orange California who reflects, "Hitting the ten year mark is a big milestone for any business. If you can make it past ten years – and survive a three plus year recession – you must be doing something right."

AIM has every reason to celebrate as they has grown into a nationwide business offering their invaluable accounting services to businesses all across America.

**About Advanced Information Management**

Advanced Information Management, LLC (AIM) provides complete accounting technology solutions and services for small to mid-sized businesses in the financial, distribution, manufacturing and service industries. For over 20 years, our experienced team has been successfully helping business like yours throughout the United States. From needs analysis to software selection; infrastructure to implementation; training to ongoing technical support; AIM will be there to help you too.
